## ANSYS CivilFEM 14.5

[Download](#)

Ver. 14.5. 4. Define the material. Material properties are defined using the CivilFEM ~CFMP command. This command automatically detects ANSYS. Net default for the material being used. 5. Define the structure geometry. Structural geometry is defined using the CivilFEM ~CFMP command. This command checks the structure geometry for errors and provides information about them. If the structure geometry does not match the specification, you will see a message prompting you to edit the structure geometry. 6. Define material parameters. Material parameters are determined using the CivilFEM ~CFMP command.
