background-image: url(.); and work good so the question is: How can i make my own code thnx A: If you're just using the attribute, you can use the CSS3 shorthand function to set background-image.

background: url(..../url/to/image.png) no-repeat center center; (note that you need to include this in your stylesheet, not inline) From the perspective of a practical DIY (Do It Yourself) lover, getting some tips for good looks to keep your floors looking clean and looking really good is not just helpful, but it is a necessity. Why

---

clean your floor at home or at work every day? Everyone knows that your hard surfaces is the most common place for dust, dirt, germs and bugs to accumulate. You can't change the fact that the surfaces in your home and your office are at a higher risk of getting dusty and dirty, but what you can do is to deal with the mess, clean it up and keep it that way. Squeaky clean floors will definitely make you feel and look better, and can be something as essential for home as for the office. Good looks and clean floors Why don't you change it? Well, the question above can be the first question you get when you start cleaning your floor. You can of course do it yourself, but to get the best results it is recommended to hire

to the already existing file, you have to be  
careful as there can be some trouble  
associated with it. RAR files don't have a  
hard linking or soft link attribute.

Although soft link is present at some level  
in them, they have no control over it.

However, with the help of a command-
