memory [Ctrl]+[Shift]+[F3]: Display the top 5 programs that uses the most memory (CPU) [Ctrl]+[Shift]+[F2]: Display the top 5 programs that uses the least memory (CPU) If you have any suggestion or comments, please email me at khyun@icafe.it. I am using a Dell Inspiron 1420 Laptop with Windows Vista SP2 and it's not been working right with Vista lately. So I decided to upgrade it to Windows 7 Home Premium. But I found this... Advertisement Top Five: Get Rid of Black Spots on Disk It's been a few days since I upgraded my new Dell Inspiron 1420 from Windows Vista Home Premium to Windows 7 Home Premium. Since I have updated my laptop, I found that there were black spots on the disks that were there before

I upgraded from Vista. After my upgrade, the... Six ways to block pop-ups, ads and other distractions Have you ever been to a website where you'd only read half of the page before the page freezes and then you get a pop-up or image ad that forces you to close the window or go back to the website? There are many ways to do this, but here are six... How to get rid of the annoying Scan Complete "sound" You're at the end of the scanning process and there's just one small glitch to fix: The screen is blank and the program has told you that it's finished scanning. You start thinking maybe you can quit the program and resume later.... How to turn "Hang the computer after X minutes" OFF in Windows 7 Have you ever been to a

website where you'd only read half

What's New In Top Five?

Top Five allows you to monitor memory usage, CPU usage, disk space, bandwidth, and list of all running processes in a useful display. Top Five comes in handy to any computer user, as it allows you to monitor memory usage and quickly identify the processes that uses most resources. Changes 1.4.1

Fixed a bug that caused the memory and CPU graphs not to be updated when a process was killed 1.4 Fixed the "tab view" in the memory and CPU graphs not showing the correct data Added feature of "tab view", which allows you to view all the information in Top Five

in the tabs view, this view is only available in the memory and CPU graphs. Optionally you can view the memory, CPU, bandwidth, disk space and list of all running processes data in a tab view or a list view. Fixed a bug that caused Top Five to crash when a user installed a new version of Windows. Options:

- Fullscreen mode: Top Five can be displayed in full screen mode, and can show all the available data in the top five as a list view.
- Auto Scroll: Top Five can be set to automatically scroll the graphs in case that there is a lot of data in the top five, and it's difficult to view them all.
- Disabled notifications: Top Five can be configured to disable notification popups that are shown when memory is low.

This version does not include a Start

Menu button because the best way to control Top Five is by a right click on the taskbar, the search bar and the list view are the same It is important to know that Top Five uses up some resources, so it needs to be configured in your computer according to the available resources of your computer Top Five runs as a Windows service, and is distributed as a.exe file that you can move to another folder without problems This version has some bugs, so I'll work on it to fix them **IMPORTANT:** If you've been using a previous version of Top Five, please read the readme.txt in the "Readme" folder to know how to update This update removes the startup entry in the taskbar, and makes the program use less memory Top Five is a

small sidebar gadget that can display the top 5 processes that use the most memory right on your desktop. Top Five comes in handy to any computer user, as it allows you to monitor memory usage and quickly identify the processes that uses most resources. Description: Top Five allows you to monitor memory usage, CPU usage, disk space, bandwidth, and list of all running processes in a useful display. Top Five comes in handy to any computer user, as it allows you to monitor memory usage and quickly identify the processes that uses most resources. Changes 1.4.1 Fixed a bug
