## What's New in the?

Powerful yet simple tool that lets you perform a quick and comprehensive scan of your entire system and then create a backup of all the drivers for your system. [...] In this review, we'll take a look at the most popular application that can change the way you play your games - Action Widgets. Action Widgets is a free game-playing software that comes with its own custom-built games and customizable widgets for the desktop. These widgets are very easy to use and can do almost anything from displaying the current time and weather, to displaying your shopping cart on an eBay widget, to a weather forecast widget, to your stock price widget, and much more. They work using a proprietary programming language (as is often the case with Flash game widgets) and are able to be used through a web browser on most computers. Because they're written in Java, the Action Widgets are able to run on a wide variety of computers, including Windows, Mac OS X and Linux. You can get them onto your USB drive or burn the files to CD or DVD, and they can run on most web browsers, such as Internet Explorer, Firefox and Safari. Using Action Widgets At the time of writing, Action Widgets offers five widgets (one for weather, one for shopping, one for stock, one for eBay and one for movies) that come with several different games. The Weather widget offers a pop-up window with your current weather forecast and location, and lets you customize the forecast window with your own choice of city, date range and time range. The Shopping widget, on the other hand, displays your shopping cart from Amazon, eBay or your local grocery store. It is able to display the contents of multiple shopping carts and allows you to quickly see the contents of the items

you've purchased. The Stock widget lets you keep tabs on your financial status and investment performance, and it allows you to track the stocks you own and your holdings. You can even get a graph showing the results of your stock portfolio, using several different stock indexes. The Movie widget lets you monitor your current movie and television schedule. There's also an option to let you control your media center, which lets you pause, rewind and play movies, as well as see your media center's current volume level. Another feature of the Action Widgets widget is the ability to customize your widgets. You can click any widget in the main window to change its appearance, and each widget's appearance options include color and a theme you can set up. It's a small and fun-to-use application, and if you're a fan of Flash game widgets, you'll be impressed with how customizable and easy to use it is. Conclusion Action Widgets is a free application that you can use to customize your desktop in a fun and fun-to-use way. The free version is limited to five widgets, but you can purchase the
