Here you can download for free and without registration all the latest games, mods, demos, screens and videos in one page: This tutorial will guide you through the steps of creating a cool new windows theme. If you have a windows 7 or windows vista theme that you would like to change the layout of, or have a simple theme you would like to change the color of, then this tutorial will help you out. in this video I will show you how to add your own logo to the widget that you can place in the start menu. Today I decided to install Windows 7 RC on a new dell laptop that I got for my wedding day. After i put in the disk i was greeted with a message that said the windows 7 installation disc was either not genuine or the key was not activated. I checked my Microsoft account and the correct key was activated. I then tried activating the activation key but this could not be done either. I checked the product key on the sticker and it was not the correct one so i could not activate it. I then activated the key through a 2 year old windows 7 dell laptop and i could not use this either. So after alot of investigating i realised that i need a product key that was sent out to dell for a old dell laptop, i opened a ticket and got the correct key, so i did it and the product key was activated. Lately there's been a lot of talk about how the XDA Developers have been good to the community and all that, so it would be nice to do a bit of saying thanks. I've created a page called Thank You to express my appreciation for what they've done. I have recently discovered a little problem with windows. Not all of it, but enough for me to take notice. Start up options When you first log on to your computer you get a start up menu. In windows 7 you have the option to log off, shut down or restart. Windows 7 has a new option which lets you run windows in safe mode. Safe Mode If you find that you are having graphical glitches, the first thing to do is boot to safe mode. If you are still having problems booting to safe mode, here is a how to article. Safe
