
Nfsu2 Cfginstaller

[Download](#)

nfsu2 cfginstaller. exe application error occurred on Windows Go to approved answer During development I used nfsu2 cfginstaller.exe which worked well. Then I updated the system and now nfsu2 cfginstaller.exe just doesn't work. I tried reinstalling and installing the package but that didn't help. I also removed it from C:\\Windows and C:\\Windows\\System32 but that

doesn't work either. I also tried
reinstalling Visual Studio 2008 but that
didn't help either. I don't know what
else to try.
