At QQ, we design our applications with two objectives in mind: to be useful and to be high quality. We ask each other every day, "is it the best we can do?" And if it's not, "can we do better?" We are proud to have a team that is constantly pushing the boundaries. KeyMacro is a keyboard for Mac users with long and/or repetitive keystrokes. It provides your muscle memory with the help of hotkeys. It will record a sequence of actions you perform in a program and then display them with text annotations. KeyMacro was originally written to assist MacBook users. Over the years it has evolved into a keyboard that will work with other Macs, iMacs and laptops. KeyMacro records sequences of actions like text entry, scrolling or clicking. It's as simple as performing a task and pressing record. Then, with KeyMacro's annotations, a summary of the sequence is displayed. KeyMacro is perfect for creating hotkeys, speeding up long key sequences, easily tracking repetitive keystrokes, and more. KEYMACRO has features to help you get the most out of your keyboard: - Hotkeys - Fastest Way to Type - Record and Visualize Keystrokes - Automatically Detects Keyboard Shortcuts - Quick Time Events - Automatically Merges Keystrokes - Automatically Applies Annotations - Syncs to USB Keyboards - Can be Used to Speed Up Your Learning - Supports all Programs - Works on all Mac computers - Works in all OS X programs TuneUp Utilities HD can optimize your Mac hardware so that it operates as fast and smoothly as possible.
