What's New In Copy File Name?

Copy File Name is a simple and convenient utility to make copying the file names of your files and folders easier. As its name suggests, the program allows you to quickly copy the names of any file or folder. To start with, you can choose any file or folder, and the program will immediately place a new entry in the context menu. Selecting a file or folder name from the menu will start the copying process. Any of the entries may be selected by using the mouse or the arrow keys. The program is also compatible with long file names, and you can select full paths, file names, short paths, URLs, UNC and UNC URLs. The results are copied to the Clipboard. The program's appearance can be easily adjusted. The options are accessible via the "Syntax" menu. By default, "Normal" is selected; "C++ and C#" is the alternative. Once you've made your choice, the file name is copied to the clipboard. The result can be pasted to any text file or used in any search field. The program is not just limited to copying file names. You can also use it to rename any file or folder. Just remember that you can only modify the name in Windows. After the program has been installed, it is possible to run the program by clicking "Application". What is new in official Copy File Name 1.0 software version? - PC window users often ask questions. How to get started, what's new, known issues, etc. Copy File Name answers to such questions. You can read about the latest changes in software version here. Publisher's Description Copy File Name is a small utility that can make the job even easier. Basically, the program places a new entry into the context menu. Thus, after it is installed, a new option is available each time you right-click a file or folder. By selecting the "Copy file/folder name" from the menu, a new window appears on the screen. There are several options that can be selected, such as the full path, file name, short path, URL, UNC and UNC URL. Any of the entries may be picked with the help of the mouse or the arrow keys. It's possible to display the names in two modes. The switch is easy to make by accessing "Syntax" in the menu bar. By default, "Normal" is selected; "C++ and C#" is the alternative. Once you've made your pick, the file or folder name is copied to the Clipboard. This means that you can easily Paste the words into any text file or search field. While copying the name of a file
