Please try the duplicate link or I can also send a message to you. Both links have been removed from the submission queue. You can help the service by not posting the same link multiple times. Currently the Duplicate Finder service is not enabled on the site. It's been a busy week in the office as we spent the last of our summer's vacation time on our laptops. We're slowly settling into the office routine, and this week's task seemed fairly easy as we focused on setting up a couple of projects and catching up on a few cases. That's not to say that the tasks have been done in a straight forward way though. For starters, they are supposed to be fairly quick to do, but something comes up and there's a chance for them to drag on a bit. These are things that we try to be conscious of, but the reality is that some projects/tasks just take a little more time than we originally anticipated. That said, here's the week in review: Winampskills We're in the process of editing our last two segments of winampskills. As of now, the editing process is nearly done. We do need to sign off on the content once it's finished, so we'll be posting the segments soon. Editing some reference material We've also started editing some of the books that we use for reference material. This will include the books from the relevant publishers along with some of the books that we use to teach people about various aspects of Windows. Books We've Edited We've also been doing some editing of the document that we use to keep track of books. This includes adding some of the relevant publishers as well as working on some of the books that we need to reference. Brainstorming for the next 5 year plan And, as always, we're brainstorming with regard to the future and our goals. We've recently looked at a couple of articles written by Ray Ozzie, and we've been thinking a bit about what we can do in the next five years to keep ourselves a step ahead of the curve in the industry. One thing that we're looking at is the topic of cloud computing. We're looking at what some of the opportunities are, and we
