Ad The first version of AutoCAD, Autodesk Release 7, was licensed on a perpetual basis. In its current release, AutoCAD (as of AutoCAD 2016 and AutoCAD LT 2016) is distributed by subscription. A license for the current release costs \$10,000 for the PC version, \$1,500 for the mobile app, \$1,500 for AutoCAD LT (which is also available on the Mac), and \$100 for the web-based app, which is similar to the iPad app in functionality. In its early days, AutoCAD was very expensive and slow to program. In 1983, Autodesk released AutoCAD 700, a version that was advertised as being "significantly faster than the previous version", and introduced the "AutoCAD System" platform for microcomputers. AutoCAD was initially designed to be a standalone desktop app, but by the end of the 1980s, there were many inexpensive graphic displays available that would be integrated into microcomputers. Since then, AutoCAD has undergone a series of upgrades, and by the beginning of the 2000s, most of the hardware functions that had once been handled in software were handled directly by the CPU. Ad The modern AutoCAD is supported by Autodesk's cloud-based version of Autodesk Design, a cloud-based CAD application for customers and a cloud-based supplier of CAD templates for schools and the public. In 2012, Autodesk announced Autodesk Fusion 360 as a competitor to Google SketchUp, offering similar

functions to AutoCAD's DWG, DWF, and DXF file formats. The most prominent characteristic of AutoCAD is its ability to build and manage 3D models, commonly in the form of a DIMENSION (dimension) file, but also as an STL or OBJ file. The software also features 2D drafting and design tools, including the ability to create floorplans and interior and exterior house designs. It also has the capability to communicate with other computer systems, particularly other Autodesk applications. History AutoCAD began development when a programmer, J. Michael Foster, created a small application to help him manage the proprietary Autodesk Drawing System (ADS) format. In the early 1980s, CAD was limited to the major computer companies, and the software was typically written on mainframe computers. Foster's small application was written for the Atari 8

In 2013, Autodesk released a new object-oriented programming language, named UnREAL (Unstructured Real-time Application in AutoCAD). UnREAL is also capable of running AutoLISP code and VBA code. AutoCAD plugins AutoCAD supports the generation of AutoLISP or Visual LISP scripts to create a wide variety of plugins for AutoCAD that can be used to control AutoCAD functionality or automate it in some way. An AutoLISP or Visual LISP script can be written in a scripting language of the programmer's choice, including AutoLISP. AutoCAD provides libraries to make it easier to create plugins for AutoCAD. They provide methods for managing the following: setting command defaults, tool defaults, menu defaults, and the option defaults command chaining and hiding basic error handling saving and restoring tool position and status basic library management and data manipulation (lists, arrays, etc.) Plugins are installed and run on demand from the user's desktop (AutoCAD R12, 2013). AutoCAD 2018 introduced that the plugin infrastructure is no longer capable to install plugins per request in the user's desktop. That is, plugins are still installed per request and are run in their own process. However, if I change `float` to `float[3]`, the `sizeof(v)` is wrong. In fact, it seems the `sizeof(float[N])` is wrong on my machine. I tried this with `-fsanitize=address`, and `ca3bfb1094`

The Houston Dash have signed English forward Rachel Hill to a one-year contract extension, the club announced today. Hill, a 2017 NWSL Second-Team All-Star and Second-Team All-American, played in 28 of 30 regular-season games (23 starts) this year, helping the Dash finish the season with the most regular-season points in the NWSL. She has been on the roster of the U.S. Women's National Team since 2015. "We are thrilled to have Rachel signed for the 2018 season," said Dash Head Coach Randy Waldrum. "Rachel is a very versatile player who can play both in the center of the park and on the wing, and her experience will be invaluable for our group as we look to make a return to the playoffs next year." Hill is the only Dash player to start all 30 regular-season games this year. She appeared in 21 of the Dash's 28 regular-season games in 2017, starting 20. In 2017, Hill started the first four games of the season before being injured in her fifth appearance of the season. Hill scored her first professional goal in a 3-2 victory over the Chicago Red Stars on August 3. "We are very excited to be extending our partnership with Rachel Hill and her family," said Dash President Amanda Duffy. "In addition to her presence on the field, Rachel is a wonderful person who has embraced the Dash family and the community as a whole. We
