There was no immediate information on any damage caused by the 4.4 magnitude quake. "The situation is calm," an official in Nicosia said, adding that officials were warning people to remain calm. "It's nothing to do with the quake; people are just scared at the moment because of the fear," a lawyer based in Limassol told Al Jazeera. "We have been learning of gradual aftershocks being felt in various parts of the country. We don't know whether the first quake had anything to do with the aftershocks," a government spokesman said. Cyprus was rocked by a 6.6-magnitude earthquake in October 2008. A total of 13 people lost their lives in that quake and nearly a quarter of its homes were destroyed, according to officials.Q: Django Multiple Inheritance class ParkingSpace(models.Model): user = models.ForeignKey(User) parking = models.ForeignKey(Parking)
