The game features: - A new, action RPG with a full-fledged story and a vast world. - A storyline in which the free-roaming exploration and the online asynchronous multiplayer connectivity are combined. - Character customization and the ability to freely create your own character. - Items and monsters that can be used and combined to create an endless variety of character combinations. - A variety of multiplayer options. - A story that uniquely combines action, RPG, and adventure into one. - A world rich with detail and charm. - A diversity of enemy monsters, items, and special skills. - A setting that invites you to use your imagination and your own ideas. Atlas: AI - Awakening of the Beast - Related Keywords: Combination, Lock - The player can select the Keywords of one or more monsters to change their AI behaviors. This will either have the Keywords of the selected monsters apply or just a single keyword (such as Hand or Attack). - The game will make the AI more aggressive in the corresponding category, but the selection is decided by the player. - The AI can react appropriately if the Keywords are changed to Non-Human. Atlas: AI - Monster Active Lock - Related Keywords: Act, Move, Active - In the Action Skill lock category, the selected skill will always be active. This will make it so that if an enemy monster is acting with a skill that is on the list of one of the player's skills, and the player changes skills, the enemy will no longer have the skill. - This is most useful when a player locks non-human skills to control enemy monsters, and wants to be able to control the enemy even if they get influenced by other monsters or get skills from other monsters. Atlas: AI - Lock Type - Keywords: Lock, Guard, Invincibility - This is the ability to lock some of the monster's abilities to the player, allowing the player to have more control over the monster. It can be done by selecting a keyword and adding the keyword to the monster, or by just leaving a keyword (such as Attack or Move), changing the current lock mode to Guard or Invincible. - If the selected ability is changed, the current ability lock mode will be removed.
