Players' "attributes" are represented by a collection of controls for goalkeepers, midfielders and strikers. Attribute controls allow players to make on-the-field adjustments during a match. Character creation also got a makeover. Prior to launch, players could create their own soccer star on the basis of attributes and their on-the-field interactions. In addition to free modifications, players can now also buy stickers, create their own kit and select a real-world player to play as in Career mode. The revamped attribute system also makes it easier to distinguish between different players with a similar attribute pool. Team management in FIFA is enhanced with new tools for creating tactics, substitutions and rucks. I got a chance to see how this works in action and I came away impressed. The new AI programming team is responsible for creating AI that can learn to play specific tactics or to be the more adaptable open play system from FIFA 18. The team is also tasked with creating more responsive players and smarter opponents. In the demo, I got to play a handful of matches where the assistant coach taught the opponents how to counter what we wanted to do. The AI systems then created a new tactic tailored to these new instructions. In the demo, I played a match versus a mostly playing tactic. The match went smoothly for me until I got a chance to play against a more challenging team. The player at the heart of the action for the AI team was ready for whatever our tactics threw at it. I was stuck on my heels as the AI team changed how it played. Without question, the most interesting AI-related demo was the one where I played three practice matches against a different AI opponent before I played the first FIFA 18-style match. I was pleasantly surprised to see the AI's understanding of certain aspects of the game. For instance, it wasn't a problem to get it to advance when I dribbled directly towards a small space, but once it showed interest, it would force a difficult pass. I may be able to beat the AI using the same tactics in Fifa 22 Cracked 2022 Latest Version if I can figure out the appropriate counter-actions.
