FIFA is the world's most famous football game. Developed by EA Canada, FIFA is a video game franchise that has sold more than 200 million copies worldwide. A key feature is the ability to create and control a single player who can lead the development of an entire club. Learn more at [EA.com/fifa](http://EA.com/fifa). The Evil Empire Motivate the league's strongest clubs to battle for dominance across the globe. The Crucial Crew Hold on to the ball with genuine stamina, tenacity, and pace. Face of the League Manage your player's training, join training sessions, and celebrate memorable moments with the press. The Journey Complete the three-step transfer process, reach the Championship and meet your ultimate club. The Penalty Kick The Penalty Kick is your ability to determine the outcome of a match. In previous game iterations of FIFA, the ball could be rotated or spun by players—a mechanic called micro-management—during any moment of play. That's all been thrown out the window in FIFA 22. Your player runs after the ball, winds up for the shot, then it feels like they've been hit with a hammer. Speed no longer just affects the ball, it affects your player on the pitch—the faster they are, the more powerful their shot is. Style Control your player's every slide tackle, dribble, and through ball, and play with an intuitive stick. When you dribble, just tap your stick to twist the ball and move forwards. You can slow down time and regather yourself after a challenge, but the player whose stick is close to the ball is most likely to strike it. A great player with the ball isn't just going to dribble past their defender, they're going to use a through ball or
