Fifa 22 [2022]

FUT has revolutionized the way football is played, creating an authentic mix of strategy, creativity, and competitive action, with enhanced real-world atmospheres and weather. Introducing FUT this time, FIFA 22 will launch with a large number of real-world kits, player faces, and players names, to ensure that FIFA 22 is as authentic as possible. Live the matchday experience in a variety of ways as you take your favorite player into the field, via a new formation tracker. Create a fantasy team from real-world players and make line-up and tactics creative decisions which will affect the outcome of a match as you build your ultimate squad. FUT is also enhanced with five brand new player types: Attackers, Creators, Defenders, Midfielders, and Goalkeepers. Trade in coins for all new FUT packs, and complete challenges to unlock themed player faces and kits. Special teams - Authentic team play is enhanced in FIFA 22 through the introduction of additional offside rules and a new chip system. Offside - The revised offside system gives the onus back to the defending team to clear the ball, as opposed to the previous system that gave the ball to the attacking team. Referee - The new chip system is based on the successful 'heel and toe' chips that have been used in major leagues since the early 1990s. Players will now drop the ball on to the turf under the offending foot, giving officials clear directional markings. Player Positioning - Chip control - The new ball control system significantly enhances the positional passing game. Changes include a new 'chip to the far post' pass control option, greater emphasis on short sharp passes, and a redesigned 'chip to area' option. Agent Management - Follow the Club Row icon to build and manage your player's personal life off the pitch, including interactions with the agents, player's appearance, and communication with the fans. Experience and improve new agent communication options with your players, and gain rewards through talks with them and by purchasing tickets for them. Skill Games - Prove your ability in a range of dynamic new Skill Games, including new dribbling and shooting challenges. Take part in 5 new one-touch interactive Skill Games that will demonstrate your dribbling, shooting,

A new season of innovation across every mode. FIFA is the world's leading sports videogame series and is now available in over 100 countries and in 8 languages on Xbox One, PlayStation 4, PC, Android and iOS. The world has the world's most popular sport: soccer. And FIFA is the world's leading videogame brand in soccer. Get exclusive demos and the latest news with the EA SPORTS™ FIFA Insider Newsletter. We've seen so many great titles rise and fall in our time, but FIFA has always been a constant. Fans keep coming back to play this unique, FIFA-developed franchise and the popularity has never waned. With that, we really wanted to put the focus on this year's launch title — FIFA 22. As we approach a new generation of consoles and the release of our new 'football generation' platform, there is no reason why FIFA can't continue to build on its tradition of fun, exciting, engaging and above all, best-in-class gameplay. "We're taking a different tact on the game than we have in the past," says John Schappelle, Executive Producer on the FIFA franchise. "Most of our effort is going toward content this year, instead of just chasing the next generation with cool new features. We're building exciting, unique new modes in all areas. Our focus is to continue creating the best-possible football experience and, at the same time, continue growing the brand. We're not going to have a sales cycle. Instead we'll release the game when we're confident we're ready to give the fans what they want. That's what we're aiming for with this game." "We're putting a lot of the great features from last year into this game. For the first time in the history of the franchise, every aspect of the game is being designed from the ground up," adds Gavin
