1. Field of the Invention The present invention relates to motion control systems and methods for controlling the speed and alignment of a trailer being towed behind a towing vehicle. More specifically, the present invention relates to an improved motion control system for use with a tractor-semitrailer type semi-trailer and wherein the speed and alignment of the trailer is independently controlled by signals from an operator of the tractor in response to a desired vehicle speed and trajectory for the trailer.

2. Description of the Prior Art Tractor-semitrailer type semi-trailers conventionally have a main tractor unit including an engine and transmission, and a secondary trailer unit including an engine and a drivetrain coupled to the tractor unit and including a plurality of wheels for rotation about a longitudinal axis of the trailer. The tractor and secondary trailer units are conventionally coupled together by a hitch configured to enable the tractor unit to tow the secondary trailer unit thereby providing a combination semi-trailer having a length greater than the tractor unit, but less than that of the secondary trailer

DJ Screw's "hit" song, "Freak N Sync", was rerecorded for this final project. In its lyrics, "You're nowhere but I'm everywhere". His song "Me and the Devil" was sampled by Jay-Z on Kanye West's song "Jesus Walks", which featured a hook line (which also appears in the song "Nigga 50 Pt. 2") by The D.O.C. The song in part inspired, a Colombian vallenato cover song titled "Jesucristo Valió Mi Vida" (English: "Jesus Christ Rocked My Life") in 2010 by Grupo Montes released

I am not your are messing up and this where it all connects. I found my way to Marni's web page, as I was looking for something different and special. I must say - I am a little bit surprised. Marni is such a beautiful designer, and yet, here she is, selling imports. I do not think I am going to pick up anything she designs anytime soon but I had to write to her. Please, let's keep the world a little more interesting. I posted a comment on Phobe's Blog about the cleaning products company, Zenith, who lists on Wall Street, but whose packages do not have any amount by weight of oil or viscous products (they have a total of exactly 10 g for the entire package) and therefore their products can not be considered "environmentally friendly". Why doesn't the FDA approve packages smaller than the size these newcomers in the cleaning products business market? What do people like you and Phobe think? That is my only comment. I guess there are government regulations as well. They are probably very strict concerning containers of any kind and couldn't really allow break out packaging if these were to be approved. I am not really sure, though. I think companies should be able to test out different package sizes for packaging
