Hiragino Kaku Gothic Std  
W8.otf 0 14 ) we have again  
identified three groups of  
candidates  
(Figure \[fig:mips\]) which are  
all relatively well-matched  
with our model, and which  
we here term the first three  
tiers of candidates.

! [Magnitude versus the  
predicted  $Y$  band absolute  
magnitude for white dwarf  
candidates from the MPFC15

---

White Dwarf Catalog with no reliable constraint on parallax (but observed to be within  $2''$  of a star to form a close pair). 

Conclusion =====

We have presented the first up-to-date (April 2018) white dwarf catalog from the MPC.

We also presented the first model of the absolute magnitudes of white dwarfs as a function of temperature, and explain why the model is

---

so close to the empirical Johnson-Kron-Cousins system. Our model allows us to calculate the distance that each white dwarf will have based on its absolute  $M_V$  magnitude, and we put it online at [ We have also explained how to use this model to quickly and easily identify the right WDs for spectroscopy at high proper motion.
