Cthulu is on the run after stealing the moon! Use the moon to influence the waves to avoid missiles and jagged rocks down below. Enjoy two different gameplay modes as you make your way through the increasingly challenging levels that test your abilities. The main campaign will follow the adventure of Cthulu who stole the moon due to his need for the power to control waves on his own planet in his own galaxy and finds himself on Earth while he attempts to escape from NASA and other enemies in his path. The endless runner

mode will allow players to control Cthulu as they challenge personal records for distance for themselves and others playing the game and this also facilitates harvesting coins for upgrades for use in the game. About The Game Darkarta: A Broken Heart's Quest: Cthulu is on the run after stealing the moon! Use the moon to influence the waves to avoid missiles and jagged rocks down below. Enjoy two different gameplay modes as you make your way through the increasingly challenging levels that test your abilities. The main campaign will follow the adventure of Cthulu who stole the moon due to his need for the power to control waves on his own planet in his own galaxy and finds himself on Earth while he attempts to escape from NASA and other enemies in his path. How to play Speed Mazing Game

This game is very fast paced so you need to move, move, move to the end with all your fingers! You need to jump and land with the right position before you run out of time. Each time you fail a game you will lose all your stars and you will need to start over from the beginning. Each star you earn is a game you can add more lives into the game.

How to earn stars in Speed Mazing Game

You need to get a Stars if you want to pass some of the levels. Each level you passed gets you one star. A star gives you more option to try harder or to just complete the level.

How to get this game for free

If you don't like Speed Mazing Game then you can always go to iTunes and get this game for free! If you have an older version you will probably need to delete it first. Go to App Store and search for Speed Mazing and download it!

Tested on iOS 9.0.1
