**Download**

A Unique Pen Tool Editor's Note: This tutorial was originally written in 2008, but has been updated and brought up to date for use with the latest versions of Photoshop CS6. 1. Basic Layers and the Pen Tool In the original version, Photoshop has a large toolbar on the bottom with the various tools and menus. However, it's found by default at the top instead. With the cursor at the top, we'll start with the Pen Tool. Underneath the Pen Tool is the Layers

---

panel. If you're unfamiliar with this, it's sort of like layers in a drawing program: You create a new layer by clicking on the New Layer button. Just like in a drawing program, layers can be reordered by dragging them up and down, and they act like windows that you can mask. The most basic way to manipulate an image in Photoshop is by using the Pen tool. It's used to draw your picture directly over the existing image or just paint where you want a new shape or color to appear in the original

---

image. The Pen Tool has four basic functions. Drawing the Shape With the Pen Tool selected, click on your canvas to begin drawing your new shape. The default options are as follows: The Pen Tool has two round brushes. A brush with a large diameter (generally between 60 and 100 pixels) creates a circular shape while a brush with a small diameter (typically 5 to 20 pixels) creates a square. The other two brushes enable the user to draw freehand, starting with a shape close to the current size or

---

dilated. A shape close to the size will be more round, while a shape dilated will be more square. If you're very experienced with Photoshop, you can create custom brushes, which are called the Brush Tool, and found in the Brush Menu. Clicking on a box surrounding the current shape creates a selection. This is the equivalent of the Lasso Tool in many other programs. A selection is a black-and-white, image-editing tool that creates a rectangular box around the outline of a shape or specific area. You can use the

---

Select tool to manually make selections. The Pen Tool does not support the use of selection tools. It is not a color or filter-based tool. Using the Brush Tool, click and drag to draw lines, shapes, or gradient fills on the canvas. The

Photoshop is an image editing program. Originally designed by Adobe, the program allows users to edit photographs and collages. This allows users to retouch images, convert color images to black and white,

---

reduce image noise and more. Both Photoshop and Elements allow users to share their work to social media, such as Facebook and Twitter, as well as printing. However, Photoshop is more likely to be the choice of professional photographers, and Elements is more likely to be a hobbyist. Price Both programs are quite affordable and cost around \$80 to \$100 for the full program. The cheapest version, Photoshop Elements 10, costs \$49.99. The cheapest edition of Photoshop is \$249. Photoshop costs about \$599 to

---

\$699. Features and Functionality When it comes to image editing and coloring, both programs will allow you to edit photos, add or subtract elements, make collages, apply filters and stamp elements, as well as do basic photo editing. However, if you are looking for other features, Photoshop will be a better option. Photoshop offers a myriad of other features such as designing, adding 3D elements, creating a website, editing video, creating logos, creating a social media account, adding text to designs, and

---

adding filters and 3D elements. The next table summarizes the features in each program.

**Productivity Adobe Photoshop:** Professional photographers and video editors choose Adobe Photoshop. The program is known for its extensive feature list and its ability to use and change layers to manipulate images. The program also has a number of movie editing features that aren't found in Elements. Photoshop also boasts that its RAW editing is the best. Adobe Photoshop Elements: Elements is an

---

excellent choice for basic image editing and colorizing. For this reason, Elements is more popular with hobbyists and younger users. Elements also has fewer features when compared to Photoshop. The Adobe Camera Raw filter is absent. Photoshop Elements 10 is the only version that is available in a free, ad-supported version. Design Photoshop and Elements are both strong in the design program, as well. Photoshop is the best choice for designing websites, logos, business cards, and e-

---

commerce logos. The program has many features that allow users to design at a high level of quality. It also allows for several online design services that don't have equal functionality in Elements. Both products contain most of the design features. Elements does 388ed7b0c7

1. Field of the Invention The present invention relates generally to devices for cutting glass and, more particularly, to a hand-held glass cutting tool for cutting a glass article such as a vase, or the like, in the preferred embodiment. 2. Discussion of the Prior Art Heretofore, there have been a number of different types of glass cutting tools which are utilized for cutting glass, especially glass articles such as a vase, or the like. In addition,

---

there has been proposed a vase forming apparatus which utilizes a drill in which the cutting bit is operative to drill holes in the bottom of the vase. The vase forming apparatus of this type utilizes a machine-powered drill to cut the top portion of the vase with the cutting bit of the drill being placed within the vase. Typically, the bottom portion of the vase is left uncut, in order to retain the shape of the vase when the vase is subsequently formed and blown. The cutting bit in the drill of this type is typically operated

---

at a relatively high speed to avoid generating sparks which can cause glass breakage. As will be seen, the present invention is not only directed to a hand-held glass cutting tool for cutting glass, but also to a hand-held glass cutting tool in which a small electric motor is utilized to drive a cutting bit or blade which is operative to cut the glass.

Q: Will my table get duplicated when I use the pivot table? I have a data that looks like this:

Vehicle		make	-----							
----		100px		BMW 200px		BMW 300px		Audi 400px		Audi

---

500px | Nissan 600px | Hyundai  
 700px | Suzuki 800px |  
 Mercedes 900px | Toyota Now,  
 if I use pivot table, it will create  
 the following table: make |

**What's New in the Photoshop 2021 (Version 22.4.2)?**

I came across the lovely New Zealand duo of Lydia & Mariah at a pop-up shop I was in as part of an exhibition. They are

---

two insanely talented jewellers, and inspired me to show them some love. Lydia is my jewellery designer and I am so excited to share with you two pieces that she has created for me.

Unfortunately I'm not able to shop in New Zealand as my accountant and I are in the midst of a divorce. My jewellery business has been a victim of this but it's all coming out fine, I'm hoping that one day soon I'll be able to collaborate with Lydia again and sell some of her amazing pieces in the store. You can follow Lydia's work on

---

her site at [www.lydiahutchings.co.nz](http://www.lydiahutchings.co.nz) I'll be posting Lydia's piece asap. We are currently selling the piece through the website so you'll have to wait a bit for the piece to be available in store. We are a paua chandelier called Aye Weary that was inspired by New Zealand's famous black and white Painted Ladies. They are stunning homes that are surrounded by the beautiful landscape of New Zealand's islands. This piece was made using over 400 paua shells that were soaked in a mixture of

---

orange juice and vinegar for 4-5 hours. These were then cleaned and set in a mould, allowing the shells to dry in a controlled environment. This is the most painstaking part of the process of making these pieces as you need to work slowly and be patient. When the shells are dry and in their moulds they were then dyed. A smaller version of the finished chandelier will be available from the store before the full model. We are also selling a piece in the store inspired by the far northern volcanic rocks of New Zealand.

---

This is a paua shell embroidery teapot. It will be ready for collection in the store on Friday. We are lucky enough to be working with the talented photographer, Ben Chapt. We have had the pleasure of working with Ben to create a series of stunning portraits of New Zealand and its beautiful landscape. We are going to be offering some amazing prints for sale for R200. Hope you enjoy them as much as we do. At the Opera House, the Labor of Love 19 May 2013
