# Figure 12-1: The software on a Windows computer is accessed with a browser. You can access the software from a web browser, as I explain in the sidebar later in this chapter, or you can download the program directly to your hard drive. When you open a Photoshop file from your computer, the program opens and displays your image as an undocked window on the screen (see Figure 12-2). Click the Window menu and choose Undock to move the window. Use the Graphics panel on the right to change the size of your image. The image file on your computer doesn't automatically appear in the panel on the left side of the window. Go ahead and click and drag your image file into the panel. Click the File menu and choose Open to open your image file. Some people find that it's easier to work with Photoshop when the image file isn't all on their computer screen. You can copy a file to your hard drive and then use it in Photoshop later.

This guide will show you how to edit an image using Elements. You can edit or create images that would look great on your website. Here are some key points to note before using Elements, You will see no options until you click the number 1 in the taskbar at the bottom of the screen. On the image of a road I added text to show that the camera was at the top of a hill. #1) You will see a form at the bottom of the screen, click the number 1 to open the form of the photo. #2) Choose from a few options on the bottom of the form, everything you

---

need will be in the first box. You will see your Camera, Format, Region, Colors, and Emulsion. In the next step, you will see you can choose to edit (if your photo is already edited), create a new image, or print your photo. After you choose the first option, you will see an order form with an image that needs to be edited or created. You can edit whatever it is that you want to edit or you can click the pink arrow and the image will be placed at the top of the form. In the next step, you will see your corrections, such as Color, Image, and Sharpen. You can use the options to make the changes you want to your image. You can make the color more vibrant by using the Adjust Color tool. If you need more control, you can use the Spot Removal tool which has more tools to choose from and gives you more options. And there are more tools you can use to make your photo more vibrant. If you want to make the image look more awesome, you can use the Levels tool to make the image more interesting. You can change the color, desaturate the photo, or invert the colors to take your photo from boring to cool. You can also add text to your photo using the Text tool. If you need more control than you can get with the tool, you can use the Selection tool. Image: (1320 x 618) You can use the File menu to create a new image or you can click the pink arrow and a series of options will appear. If you want to choose from a preset or make your own, click the Number 1 on the form that is below the options. After you have chosen, 388ed7b0c7

Sicko, about a fictional U.S. President who has AIDS, stars popular musician Michael J. Fox as the titular President. The film was written by American playwright Tracy Letts, and the original title was “You Kill Me.” But the original “You Kill Me” script was in development hell for years, and several different directors were attached. And according to Variety, the movie never reached theaters because the filmmaker’s was facing a series of lawsuits concerning the rights to use Michael J. Fox’s likeness. “The money that was being spent — that had to go into trying to settle the Michael J. Fox lawsuits that were flying all around — that was money that would have gone directly to the making of the movie,” says David Morris, Sony Classics chief of distribution. The film opened March 4 and grossed \$9 million at the box office over the long Easter weekend. The film, which stars Michael J. Fox as a political candidate who has AIDS, also stars Catherine Keener, Bill Pullman, and Christopher Walken. Morris says Fox isn’t too worried about the box office performance of the film because it was the actor’s choice to star in the film, and he will make back his investment. “We’ve been thrilled with the movie,” says Morris, “We’re not even going to talk about how much they’re spending to promote it because we know that Michael J. Fox thought it was an investment in his career and his image.” The first trailer, released in January, was a hit on YouTube with more than 20 million views. Fox is embarking on a new television project, also about a politician with AIDS, and he’s currently filming “Community” in Boston. Fox is still an executive producer on “Family Tools.” All of the modern soaps on the market at the moment come with moisturizers to nourish and protect the skin. This is to reduce the risk of excessive dryness. The result of these moisturizers is that the skin looks a little more plumped up or softer. It also makes the skin appear more radiant. My body does not like to be left alone. It does not like to be left in any way isolated. So I want my skin to be looking and feeling good all of the
