All rights reserved. Five of the best Facebook games that won't cost a penny. As of mid-2013, roughly 2 billion active Facebook accounts used the social networking site on a daily basis. Like other social media platforms, the site was once used mostly by young adults and college-aged college students. Over the past years, however, the number of adults and teens using Facebook has greatly increased. As you'll see with these five choices, the appeal of social networking has spread beyond the realm of adolescents and young adults. 1) Solitaire Social games were the first Facebook games released. Solitaire, in particular, is an extremely popular game across various social media platforms. It's quite simple: You're given 100 cards. Your goal is to distribute the cards into four suits—Clubs, Hearts, Spades and Diamonds—in numerical order, without any two cards of the same suit. Cards can be moved between the four suits by dragging them. With each consecutive move, you get a bonus. 2) Mince and Fortune The game's name is derived from a famous Shakespearean soliloquy. There are three rounds in this game: The beggar, the mincemeat, and the leper. In

Wallpaper Timer is the ultimate small and simple wallpaper changer/ animator/ timer. Wallpaper Timer is a tiny widget that allows you to set an unlimited number of pictures to switch and apply as wallpapers, based on a user-defined time interval. It can be effortlessly installed and set up, regardless of the user's skill level. The interface of the application is represented by a small frame that you can move to any position on the screen, with the help of the mouse cursor. It shows thumbnails of all pictures from the default folder and allows you to navigate them. By opening the Options screen, you can alter the default folder containing the pictures you want as wallpapers, include subfolders and enable shuffle mode. But you can also make the images fit the screen or appear tiled or centered. The time interval for the transitions can be defined in seconds, minutes or hours. Thanks to the default options provided by the operating system, you may also increase the frame size, make it stay on top of other windows or adjust its opacity level. Wallpaper Timer barely uses CPU and system memory, so it does not interfere with the runtime of other currently running processes. It has a good response time and works smoothly, without making the operating system hang, crash or pop up error dialogs; we haven't encountered any problems throughout our evaluation. Thanks to its intuitive layout and overall simplicity, Wallpaper Timer's features should be seamlessly figured out, even by novices. Wallpaper Timer Features: Resizable/Rotatable frame. Set time interval in seconds, minutes or hours. Set number of seconds/minutes/hours by using a dropdown menu. Set distance between images. For each set, you can specify a random mode, if so desired. Settings saved automatically to the Preferences file. Enable/Disable shuffle mode (using a check box). Unlimited number of images from the default folder (expand the folder to see all the images). Save settings on exit. Restore session on exit. Set maximum number of images in the default folder. Options screen to adjust the shape, position, size and opacity of the frame. Options window to specify folder location, including subfolders. Options window to enable shuffle mode. Wallpaper Timer Settings: Wallpaper Timer is a small and straightforward b7e8fdf5c8

===== Wallpaper Timer is a small application that lets you apply endless sets of wallpapers to your desktop and has the ability to rotate them based on a user-defined interval. To set up the application, you only need to insert the wallpapers you want and the time interval for the transitions. Once the walls are set, you only need to click on the Wallpapers Timer frame and move it to any position on your desktop to begin the switch sequence, where each wallpaper gets displayed. Wallpaper Timer allows you to: * Set the number of wallpapers to show * Set the time interval for the transitions * Rotate the wallpapers manually or automatically * Set the repetition of the cycle * Enable the shuffle mode or not * Set the number of wallpapers to tile * Set the size of the frame * Set the opacity level * Increase the frame size * Set the frame to stay on top of the windows * Control the pointer displayed when moving the wallpapers frame * Enable the double click to start the application Wallpaper Timer Screenshots:
