A: Using awk and based on the given sample input: `$ awk '{if(match($0,"^{2}[a-zA-Z0-9_]{2,})"){print substr($0,RSTART,RLENGTH); exit}}'` in1.txt > out.txt This should output all lines that start with 2 or more. and end with 2 or more [a-zA-Z0-9_]{2,} and print to out.txt. I'm assuming what you are after here is the first word following the period in a line, so there are no leading periods in the input. If this is not the case, you can use this command instead: `$ awk '{if(match($0,"^\.{2}[a-zA-`

Z0-9_]{2,}")){print
substr(\$0,RSTART,RLENGTH); exit}}' in1.txt
> out.txt Edit: The main issue with your code
is you are trying to read in a file as a string.
Unless your file is very small, this will not
work. Here is a better way of doing it
(assuming you are still looking for the first
word following a period): \$ awk '\.{2}[a-zA-
Z0-9_]{2,}/ {print
substr(\$0,RSTART,RLENGTH)}' in1.txt >
out.txt This will print all of the lines that
match the format for the given sample input.
Edit 2: Based on your comment, the modified
code that will get you what you want is: \$
awk '/[^\.]{2,}[a-zA-Z0-9_]{2,}/ {print
substr(\$0,RSTART,RLENGTH)}' in1.txt >
out.txt Q: How do you create a grid layout like

in the following image using CSS grid? I'm trying to create a grid layout similar to the example below: I tried using display: grid and also floating the divs but I wasn't sure how to make them divide the screen evenly. A: Here is an example with flexbox .container { width:
