About This is a mod that have not been officially made by me, but a mod who made for his mod (and my to ) re-uploaded and re-released in a new version. The version 1.7.8 so he made a few updates, mostly to fix a bug. Mod description This is a mod for GTA 5, the add a lot of things that will make you have a different kind of life. The first thing that will happen to you is the giant 12 feet high masks that cover all the Los Santos. (with the exception for the ones who are mad at the player for some reason.) The masks have a web between them, which is one of the places where you can take your money. How you will take the money is up to you. You can click it to give it to the web or you can stab it and run away. It will cost you 10 bucks. For instance, on the second picture, you can still hear (the music) inside the mask. The second thing that you will experience is in the multiplayer. You can feel the players, who are in your friend list. There is also a Multiplayer mode. In this mode, you can play the game on your own (you don't need to be friends with anybody for multiplayer). The third thing you will experience is when you buy an new house (but you don't need to buy it allready). You will be able to buy vehicles, cellphones, new clothes and other stuff. The fourth thing that you will experience is in the gameplay. You will have increased health, damage to your vehicle and a new weapon. The fifth thing that you will have is in the loadout. You will be able to choose your own vehicle, damage, weapons and more. And the sixth, and last thing that you will experience is in the story. You will be able to buy new clothes, interact with new people and eventually complete your mission. You will have a mission available for now, but you will be able to access it after the events of the mod. There is no group buy for this package. While this upgrade is clearly not worth buying the whole package, if you're interested, you can buy the parts individually. Note: While the price on this site is \$30.00, the price on Steam is \$43.59 at this time. This is due to Valve (Valve) changing the distribution on the
