Are we doing enough to spread it? Do you think we are too selfish? Do you like making things? Do you think all these people are nuts? Do you like to dance? Do you like to sing? Do you like to go to the beach? Do you like traveling? Do you like Hawaiian shirts? Do you like to hang out with your friends? Do you like to be around people? Do you love life? Do you love the world? Let's Love It! Sunday, May 4, 2012 Warm Summer Lovin' Ahhh...its so beautiful, just sitting here on my patio enjoying this warm weather. I don't think our County has had so much rain in at least 25yrs. We've had a couple of more heavy showers, but not like this. In the last month we've had 6" on average. Not sure when the last time we've had this much rain was.

Our garden looks great and not a weed in sight. The lilacs are coming into bloom all around my world. The sunflowers are already on the roof tops. I haven't seen so many hummingbirds this year. Lacy is still a baby this year, so he isn't around much. He's kind of a low maintenance baby, mom can feed him, change his diapers, clean up the messes, and he'll be fine. 6 comments: Our winters are so unkind right now. I love this weather and I love my ugly world. Sounds like you are having a good time, unless I am seeing that he has a hang nail and will be a sissy little boy soon. I am interested in researching how to use the model organisms *Saccharomyces cerevisiae* (baker's yeast) and *Drosophila melanogaster* (fruit fly) to investigate age-related changes in cognition, given that both models have been shown to display changes in cognition as they age (Gonda et al., 2018; Spencer et al.,... Hi! I am an undergraduate studying Bioinformatics at the University of Michigan. My research focuses on understanding the genetic events that cause cancer, and researching potential therapeutics for these conditions. I have experience working on and developing software and analyzing datasets. For more information please contact me at [nisgahaie.green@kennesawstate.edu](mailto:nisgahaie.green@kennesawstate.edu) I have been working on several gene networks for several years. I have done countless simulations of these networks and have been testing various hypotheses. My hypothesis for moving forward is that glucose homeostasis is achieved by the... I am currently working towards my Ph.D. in clinical physiology, investigating the neurobiology of cerebellar motor control, with an emphasis on how it changes with aging.
