The ultimate aim of the project is to provide a more responsive on-the-ball experience for players and add a new dimension to gameplay. This year, FIFA 22 has introduced the most realistic ever digitised player models as well as improved ball physics and AI. The accurate motion capture captured from real-life players also provides a snapshot of how they play football, capturing the things they do best. This new technology has also allowed us to create more authentic ball physics, utilising an improved algorithm so that the ball behaves more like the physical one. FIFA 22 also introduces a variety of new modes, including the popular New Game Plus, On the Edge and Combat Training. The brand-new Epic Moments mode has also been added, which offers up to 15 minutes of gameplay length, where you have control over the outcome of the game. The game will feature new online modes, including weekly Super League matches where you play 20 matches, as well as the new Rivals mode, where you can face your friends' most experienced, up-to-date Ultimate Team and Carousel players. The game will introduce a series of brand new challenges, including the Ultimate Skill Challenges, while other changes include the new Ultimate Vault Mode, which offers a unique obstacle-strewn arena to test your skills, as well as new ways to play online, using the All In One Pass feature. FIFA 22 also features improved matchday and live match viewing modes, while the new Over The Grass Viewing and Storylines Branches modes allow you to view games from different angles and gain an in-depth understanding of the game. Elsewhere, the new 4K UHD and Ultra HD support offers more than twice the detail compared to 1080p, while an improved stadium movement system allows you to navigate stadiums with greater ease. FIFA 22 is available now in stores and on Xbox Game Pass. U.S. Pat. What's new in Fifa 22:

- **Dynamically generate goalkeeper line ups - When the opposition are set to face your starting XI, rather than manually selecting from the goalkeeper ranks, choose the man that's best suited to challenging the shot on the day using real-life player data. You can modify-by-hand to change lineup when the opposition is set.**
- **Introducing Referee features - Make matches even more authentic when you play as the match officials.**
- **Defoe criticism has become a near cliché in modern football, with the recent commemoration of Robin van Persie's 20th goal for Arsenal perhaps a case in point. EA Sports has taken the easy approach to this episode in history by making it simply ridiculous that Jermain Defoe wasn't voted a substitute for the Premier League player of the year awards last year.**
- **In-game news feed is now powered by Associated Press - AP is the largest and most trusted U.S. source for breaking news and dispatches more than 26,000 photographers and reporters in 137 countries to cover the stories that matter most to the world's media. We will showcase AP reports as well as stories from the English language news publishers, all under the EA Sports banner. The AP news feed is now powered by EA's Social Media Platforms team—a sub-group within EA SPORTS.**
