The terms of service says "Beta is for Mathematicians and Code Monks." I think that a review is required for reviews which: involve statistics and similar fields involve a specific utility involve a specific programming language involve a specific topic involve a specific website A: We don't have access to a review queue at this time. We'd need a quite a bit of coordination to do so, and we feel it is premature to do so until this is proven to be a real problem on the site. If any Q&A sites have a review queue, it should be explicitly named as such. We don't want to be like Wikipedia that hides all of the review processes and then is caught off-guard when it is needed. Q: Why the author of this book skipped the referencing in his book? While I was reading the book "Effective Java" I found an interesting feature in this book that the author declared the other books or the resources which the author mentioned in his book. I didn't find the declaration of the reference in the book "Effective Java". Why the author of this book skipped the referencing in his book? A: Perhaps for good reasons, that's difficult to say without knowing the full context. I suspect it comes down to style. You see a lot of programming books in which the author tends to "slop in" references at the end, even though the author doesn't use references in their own books (see many "intuitive" books). It could also be that the author has little interest in references, because he assumes you will be able to figure out what the author refers to in the text from context, perhaps using prior knowledge. I'm sure some readers do, but in my experience many do not, and they are also the ones who may be the most annoyed by "slop in" referencing, as the author's stated intention. . "What for?" "Nothing in particular, I just thought you might like to try out one." She thought for a moment before saying "Well, we've got fresh bread in the kitchen, so why don't you grab that and I'll pack one up for you." "Ok." Simon said, thinking that the toast would be nice. He walked back to the kitchen and got out of his jacket and the bread and got back to the lounge. "If you're going to sit on the sofa, I'm taking my position on the chaise." Ellen said, already on the sofa. "Ah, this looks nice." She added, looking at the toast as it turned out. "Thanks." "So, what's your story?" "What do you mean?" "Where you from? Where your friends are?" "I'm from Somerset and my friends are in England, probably Leeds." "Oh, I see." Ellen replied, putting the toast down
