This game is the VR edition of “DIY MY GIRL.” This VR game lets players freely change the girl avatar’s hair and clothes, head, body shape, and face. This game is also unique in that it allows players to upload a photo from their computer to generate the face of their choice in the VR world, as opposed to merely downloading a photo in an existing format. Thus, this game is designed to support all types of VR headsets, including HTC Vive, Oculus Rift, and Valve. Things to note: (1) This game is unique in that it allows players to customize their girl avatar through photos, unlike existing simulation games that only allow players to download a fixed photo file or an avatar from Steam. (3) Players can use the downloaded photo to customize and set a face of their choice. Players can also change the name (without an avatar) and hair of their girl avatar. (4) Players can do these actions from the photo screen that is not connected to the game. (5) This game offers the following six features in the Game Room scene: 1. AI Goddess, 2. Avatar's Love/Hate/Demand, 3. Cute Doll's Love/Hate/Demand, 4. Dances/Customized Dances, 5. Couple Tour, 6. Avatar's Dress/Expand Face/Change Shape/Dance/Customized Dance. Q: How can I sort by date? I want to sort a list of objects that I get from a DB call. It's a list of employee file records. How do I get them to be ordered by date that I manually set? I don't want to sort by the timestamp from the database because that's not the issue.

A: Try this:

```
var employees = new[] { new Employee {ID=1, Name="Foo"}, new Employee {ID=2, Name="Bar"}, new Employee {ID=3, Name="Fizz"} };
employees.OrderBy(e => e. d41b202975
```

What's new:

DIY MY LADY IN VR WORLD **DIY MY LADY IN VR WORLD** is an interactive fantasy visual novel with basic controls! In most games of this kind, pressing the "start" button takes you to a certain point in a quest. But in this game, you actually have the power to set the quest, where you can tap on any option in the corner to change it to what you like! I like the heavier more rocky, mountainous background for the characters. Like in the map. Just tap on the options below to make some changes! With this type of visual novel, the protagonist is going to

experience the story. A full canon to any popular element from a show or film! That's what I meant by interactive fantasy. Your choices influence things in the story, so it's totally unique each time you play! Grab your VR Google Cardboard or a real cardboard and a Bluetooth enabled gadget like a PS4, Xbox, or laptop and go have fun! This is just one of the 3 visions I have for the characters. So many, in fact.

Misleading colonoscopy of the terminal ileum: report of four cases. We report the case of four patients, whose examination and initial colorectal pathology revealed no terminal ileal lesions. This erroneous result was accompanied by a normal serum carcinoembryonic antigen level in three of the patients. All patients had subsequent barium enemas that revealed inflammation at the ileocecal valve. Further investigation showed Crohn's disease in all patients; the three with chronic diarrhea had pelvic ileocolic fistulas. Despite their correct diagnoses, they all still underwent colonoscopy with the purpose of anatomizing the last ileum. We review the medical literature and discuss the reasons for such misleading colonoscopy.
