This website is provided. the full version of TransCAD, if you are an existing TransCAD user, contact the. The accession number of SRA is STUDY: PRJNA592744. TransCAD with new version - new toolbox.Q: How do I create a popup with a progress bar in iOS? I know this question has been asked countless times, but I can't seem to figure out how to do it. All I want to do is make a popup pop up from where I want it, be it over a UIView or such, and have a spinning clock or progress bar in it. Not sure how to go about it and Google hasn't been my friend. A: I would start with this tutorial. Note that there are several ways to start a spinner, see this Stack Overflow article. Then look at this Stack Overflow question which gives 3 tutorials for managing a UIActivityIndicator. Q: Django-cassandra = json object error I would like to receive some data from my Cassandra database into my Django application. This is my code snippet: Python code import json from cassandra import Session from django.core.cache import cache session = Session() class TestDjangoCassandra(object): def __init__(self, session): self.session = session @cache.cached(timeout = 3600) def get_counts_from_cassandra(self): row1 = self.session.execute('SELECT type, count FROM TABLENAME').fetchone() row2 = json.loads(row1[1]) return row2 My call to get_counts_from_cassandra function from django.core.cache import cache import from django_cassandra.lib import cassandra_connector from test_c
