

April 14, 2012 - USA The nvflash package has been updated to R2 but I will need someone... from 120109 then you just need to flash updater_120109_R2.zip... I tried it from my machine and it worked and I tested it with my copy and it works. I had to see for myself. So I did this: 1) Download the firmware update file from Dell.com. (It has a release date of October 12... But you must have access to it). 2) Extract the file to your desktop. 3). Turn off your computer. 4) Insert the USB key into the USB port where it works. 5) Connect your computer to the network. 6) Restart your computer. 7) Connect the USB key to your computer.
