It worked once, but has stopped working again. I got the latest version of SketchUp Pro. I installed the 2017 version on both my MAC and PC. On my Mac, I can create new models just fine. On my PC, when I try to open a new model it says it's "not authorized or incompatible with your license". I have SketchUp 2019 Pro and installed the 2017 version on my PC, but it says i do not have the latest version of SketchUp Pro installed on my mac. The license valid date on my mac is April 1st, 2019. The only way I can see my mac now from my pc is to download and run TransPaste and put the mac's IP address into it. Now when I run TransPaste I can access my macs local network. I have the latest 2017 version of SketchUp Pro.
