**Windows 7 Home Basic OA LATAM Hp !NEW!**

**Download**

---

press the windows key on your keyboard and a search window will open. select all tasks and then start task manager. you can save the registry file in it's original location or anywhere else, for example, the desktop. i would recommend to backup your registry files before doing the process. you can find a backup of the registry files that are default in the windows directory. for windows 7 home basic oa latam hp. i also have a backup of all my registry files in the `c:\windows\system32\config\regback.nsf` the registry files are in the folder `c:\windows\system32\config\regback.nsf`. you can also backup your entire windows directory in `c:\windows\system32\config\regback`. on the other hand, you can also backup your entire windows directory in `c:\users\public\files\regback`. you have to do the backup process using the windows command prompt. at least, it is the only way to do the backup using the registry files. you can also backup the registry files using the windows registry backup tool. use a password of your choice. if you have a backup of the registry files or a backup of

---

your entire windows directory, you can start the process of activating windows 7. but, if you are using the backup of your entire windows directory, you will have to do some changes in the registry files. i'll tell you how to do the activation process for the windows 7. i'll write the backup of my entire windows directory for you. your computer will stop working while doing the backup process. you'll have to press the f2 key and then the reset button to continue the process. this process will take about 10-15 minutes. if your computer doesn't give you the option of the reset, please try again. the backup will continue and will finish the activation process for you. the backup process will take a lot of time. you'll have to close the command prompt to continue the backup process. to start the backup process, open the windows command prompt. navigate to the `c:\windows\system32\config\regback.nsf` folder. you'll have to `cd c:\windows\system32\config\regback.nsf` in the command prompt. press the enter key. this will open the regedit application. open the registry file with the backup of your entire windows directory. you'll have to

---

find the key: hklm\software\microsoft\windows  
nt\currentversion\winlogon. this key contains the user  
name. to see the user name, you'll have to expand the  
key to the registry file. now, you'll have to find the key:  
hklm\software\microsoft\windows  
nt\currentversion\winlogon.

### **Windows 7 Home Basic OA LATAM Hp**

i purchased an acer aspire one with windows 7 home  
basic and it has been working fine but now it is just  
randomly freezing up and i can't get to the desktop. i  
was wondering if it is something that i can get rid of. it's  
getting to the point that i'm not very productive. i would  
like to know how to get rid of it. i bought an acer aspire
