All you should need to do is to copy and paste the below contents into a notepad (as opposed to using a text editor) and save it as afdv.bat (you can do this in any text editor) and then run the.bat file. This may need to be re-run every time you run a new title patch. But it saves lots of time. This works for Mount and Blade games only. I know this reply is old but thought I'd post it here in case it still helps someone.. Made with the mount and blade (warband) crack by rms. A small script to delete the copies of mount and blade crack in the winini.dat folder. This is only for warband (mount and blade). Just copy this to the winini.dat folder and run again the game. It must run this instead of the winini.bat because if you run again the winini.bat the previous game crack is loaded and is not overwritten by the winini.bat script that deletes the game patch. Mount And Blade: Warband is the second expansion to the MMORPG/Tactical RPG/Co-op sandbox (addicting) game Mount & Blade. After being awakened from a life of slavery at the service of the gods, the player is embarking on a campaign to overthrow the evil empire that holds them captive. oh my god this game is so not terrible it actually beat Mount and Blade 2 and i liked Mount and Blade 2 more. also it has a good good story and the new i should actually like this game it has all the basic mount and blade 2 stuff plus a original story in an semi open sandbox setting. so yeah this game isnt just like Mount and Blade 2 and im glad i picked this one instead of the 2 year old Mount and Blade 2 port.
