"we think there's a lot of potential in the game - and with it, the controversy," says rockstar's office director, sam houser. "we think this is going to be a very interesting and entertaining experience, and we think there are a lot of people out there who are going to love it." with this, rockstar brings the story of manhunt 2 to a close. since the title's launch on pc, playstation 3, and xbox 360, rockstar has introduced a number of major features in the game, such as online headshots, the introduction of "death by misadventure", and the introduction of the character, layton. all of these features have been met with huge success, and it is clear that manhunt 2 is an important title for the company. "we can't thank the community enough for the support that they've given the game," says houser. "we're very proud of the game we have, and we think it's something special. it's a game we want to continue to build and we're very happy with the progress the team has made and the way they are executing their ideas. they are a very talented group of people, and it's a pleasure to be working with them."
