Of course, there are some new features in Europa Universalis III. The more you research, the deeper you get into the knowledge system. Using the knowledge system, players can research new technologies, discover new units and find out more information on the history of a country. The idea is that it is only through the knowledge system that you are able to keep up with the development of your country. The growth of your nation is therefore influenced by the growth of your knowledge pool. Divine Wind does a really good job with innovations in the strategy game market. The most important innovations have been put into the expansion, such as the new commerce system and the idea that the building of a city can influence the level of education. Players can build schools, libraries and universities to improve the level of education of their people. The city's authority will make the inhabitants more likely to support your country and study harder. On the other hand, if you create a military school and use it to produce more soldiers, the education level will decrease. The new commerce system is the most important innovation in the strategy game market. The resource "Money" is now given to your country in addition to energy and culture. This means that you can use real cash to buy some resources and produce units for your army. This new commerce system allows players to gain new resources by buying and selling goods, while at the

same time, you need to produce more and more troops. Through the new system, Europa Universalis III has won back some of its international market share.

Europa Universalis III gets people talking. With the release of Divine Wind, Europa Universalis III has taken the online community by storm. The mixture of realistic aspects of the historical periods, a beautiful 3D graphical style, a new interface and a ton of new mechanics make Europa Universalis III one of the best games to be released in the last three years. An important fact about Europa Universalis III is that the only way to play it is on Steam. Even though it contains a lot of innovations, the game doesn't feel like an addition to Europa Universalis III, as it is a stand-alone expansion. There are no new settings, so

everything new in Europa Universalis III can be explored. The basic gameplay is very similar to Europa Universalis II. Player nations are led by a single leader. This leader can get advice in the Diplomatic Screen and information about your country and your opponents. Just like in Europa Universalis II, the leader of a country can be given orders, sent on missions and given special orders. 5ec8ef588b
