blind-folded and this is the happiness of every woman on earth.Q: How to access to script data using
only jQuery? I have in my DOM a div (textarea) and a script (file.js). I'm creating an onclick event,
that shows a loading dialog. When the user clicks OK in the dialog, I want to execute the script in
the script (file.js). Is it possible to access only to the script with jQuery? I'm using this code:
<pre>if(!\$(document.scripts).get(0)){ alert("No Scripts Found"); return false; }</pre>
$if (!\$ (document.scripts).get (0).id) \ alert ("No\ ID!"); \ but\ I\ don't\ have\ success.\ My\ problem\ is\ that\ I'm\ not$
able to access the script object. How can I access it?
