- A simple Rainmeter skin for Windows 8 that can open frequently used folders and applications. - Includes icons of those apps. - Works with Vista and Windows 7. - Activates Windows Explorer with a click of a button. - Uses the same folder hierarchy as Windows Explorer to open the desired folder. - Supports changing the desktop background and resolution. - Supports scroll bars. See larger Screenshots below..Q: Could not parse parameters - input='path

to image' I am trying to show a different icon when the desktop background image is changed, but the following code is giving me this error: {'Error': 'Could not parse parameters', 'Response': {'ContentType': 'image/jpeg', 'ContentLength': '232141'}} I have tried a lot of different variations, including without using the get request. I have also tried variations using ".jpg" and ".png". The issue is the same, regardless of what the actual name of the desktop background image is. Here is my code: import requests from PIL import Image r

```
= requests.get('') p = r.text
response =
open('H:/public/test.txt', 'w')
response.write(p)
response.close() pathToImage =
r"H:/public" pathToImage +=
"test.jpg" r =
requests.get(pathToImage)
r.headers = {'User-Agent':
'Mozilla/5.0 (Windows NT 6.1;
Win64; x64; rv:47.0)
Gecko/20100101 Firefox/47.0'}
r.encoding = 'UTF-8' p = r.text
print(p) img =
Image.open(pathToImage)
img.thumbnail((newWidth,
newHeight), Image.ANTIALIAS)
```

img.save(pathToImage+"test.jpg", "JPEG") r = requests.get(pathToImage) r.headers = {'User-Agent': 'Mozilla/5.0 (Windows NT 6.1; Win64; x64; rv:47.0) Gecko/20100101 Firefox/

What's New in the?
