What's New in the?

Venis IX is the easiest, fastest, and most powerful environment for developing install scripts with NSIS. Featuring advanced syntax highlighting, inline and visual API tips, a function and section folding feature, compiler error support, a multi-document interface, file toolbar, and more, Venis IX helps you to get right to the point and move on. As a visual environment, Venis IX makes writing and maintaining NSIS scripts simple and easy. You don't need to remember which commands are built in; use Venis IX and get right to the point. With Venis IX's flexible and powerful features, you can easily write and maintain NSIS scripts. It's the most powerful and easy to use NSIS development environment available. Venis IX is a complete NSIS development environment. It helps you to write, compile, run and debug NSIS scripts. Venis IX provides powerful NSIS environment features which are not found in any other NSIS Development Environment: *Visual Environment: Venis IX is the only environment that supports Visual Studio Development. It also supports NSIS 2.0.x and NSIS 3.0.x. *Folding Section and Function: It will make your scripts more concise and readable. *Advanced NSIS Syntax Highlighting: Venis IX is the only environment that supports NSIS's sophisticated syntax highlighting. *Improved Auto Completion and Goto Error Support: It will greatly improve your NSIS development. *Multiple Document Interface: It is the only environment that supports multiple document interface (MDI) with a file toolbar. *Edit and Run NSIS Script: It will help you to edit and run NSIS scripts. *Syntax Highlighting: Venis IX is the only environment that supports syntax highlighting in both scripts and dialogs. *C/C++ Exports: Venis IX provides support for C/C++ exports. It also supports both NSIS 2.0.x and NSIS 3.0.x. *Fuzzy Search and Replace: Venis IX provides fuzzy search and replace function in scripts. *Python Exports: Venis IX provides support for Python Exports. *SDL support: It provides support for SDL Exports. *Nsis Plugin support: Venis IX supports loading plugins. *Key word API Support: Venis IX provides support for NSIS plugin development. *Compiler Goto Error Support: Venis IX provides support for Goto Error. *Advanced Function and Variable Grouping: Venis IX provides you with powerful tools to group function and variables. *Block Qualifier Support: Venis IX provides support for block qualifiers. *Unit Test support: Venis IX provides support for unit test scripts. *Static Template support: Venis IX provides support for static templates

System Requirements:

OS: Windows XP / Windows Vista / Windows 7 / Windows 8 Processor: Dual Core 1.6 Ghz processor or better Memory: 1 GB RAM Hard Disk Space: 8 GB DirectX: Version 9.0 How to install (Optional): The download file is a small.exe file. Extract the zip file and play as you normally would on Windows. Note: Because of the compatibility issues, running a 32-bit application on a 64-bit Windows system, there is a workaround in this
