When it comes to text documents, the Internet offers many applications and programs that you could use. One of them is CryptoFile Torrent Download. It's a neat software solution that helps you create various text documents and encrypt them using some tools. It doesn't have any text formatting tools, which is quite inconvenient and it has few features for editing text. Small and simple graphical interface The application installs quickly and it sports a really small and lightweight graphical interface with only a few tools at hand. It doesn't come with any tips or instructions, but you wouldn't really need them since the interface is quite easy-to-use. It also doesn't have any customization options, so you won't be able to make any changes to the application's interface. Create text documents easily You simply need to start typing in order to create text documents on your computer. Unfortunately, it doesn't come with any text formatting tools, although it would have been nice if you could change the font size or style. It doesn't have text alignment tools and it doesn't even come with word wrap. It also doesn't let you add bullets to your text and organize information to make it easier to read. Still, you can insert various objects, including pictures and other types of files. You can cut, copy or paste phrases in your document and it lets you search and replace words easily. More features and tools It would have been nice if you could import documents and edit them using the application. You can search for various words inside your documents. When you're done working, you can save documents on your computer. All files are saved with the .ptx extension. Unfortunately, it doesn't allow you to print text files or export them to another application. All in all, CryptoFile is a small software solution that allows you to create text documents on your computer and encrypt them easily. However, it's missing some essential features. CryptoFile is a small and very simple text document editor. It doesn't come with many tools. Unfortunately, it doesn't have any text formatting tools, so you won't be able to change the font size or style, but it does let you insert images, bullets, and customize the text.
