Below are the programs I use the most: In the Weight the Good program, the word "quality" appears in the light blue coloring. I've reviewed each program for quality. Its my go-to tool for the most demanding jobs. The New Theme Maker is a group of small subprograms that mean I never need to open Photoshop or Photoshop Elements again. The Character and Font panel remembers my favorite character and character combinations. Below are more reviews of other programs I use: First-time users of the new version see a desktop and welcome screen with a collection of galleries to choose from. (I photographed mine.) If you've been with the program for a while, you'll note the old welcome screen remains in place. (No loss there.) This is a subtle change, but a welcome one. I like how the new screen promotes sharing the features of the entire program, not just its basic editing functions. Adobe has managed to keep the graphic user interface familiar, but has added some new navigation icons. It's a definite plus because the use of icons is one of the ways I've been able to learn things as I go along. Best of all, the program can be set to use hard copy labels if you prefer. The New Image Browser lets you browse your images, choose a template, crop them and include them in the document. It is well designed and should serve screen-readers well. The Camera Browser features a unique type of catalog, but I prefer to move the images around with the Paths panel, which is a tool I use a lot.
