In a rapidly changing world, being an optimist is critical to your success. But even if you are an optimist, there comes a point when you need to put aside your optimism and act boldly and decisively. That candid moment comes when you look at an old situation and ask yourself what needs to be changed. Fortunately, we have designed our 2018 update of Photoshop with that kind of bold, decisive eye. Here are a few of the new features coming in Photoshop CC 2018. Image Merge and Layer Match—Now you can use Adobe Sensei and machine learning (ML) to join similar images into one image or address inconsistencies between similar layers in a single operation. Automatically Optimize for the Web—Automation can do some of the work for you, but you can't leave it up to the images.
