A: While Microsoft won't be able to help with programmability, there's at least a chance that some folks on SuperUser can help you narrow down what program is doing. Take a look at Analyze Your Running Process for a bit of context. From there, you'll get to the "Programs" tab, where you can get more detailed analysis. Finally, check out TechNet's Index.

Former "Real Housewives of New Jersey" star and reality TV star Teresa Giudice has been arrested for failing to appear in court for her fraud trial, which got started last week. Teresa Giudice, 47, was charged with 41 charges in connection to a scheme that allegedly took place while she was in charge of operations for a now-defunct multi-level marketing company. The former "Real Housewives of New Jersey" star appeared in court on Tuesday and was released without bond on \$250,000. According to court documents, Giudice was ordered to surrender herself on June 28, 2014 for the start of her trial, which was set to begin Monday. She failed to appear for the trial, and her bond was revoked. Source: Yahoo

Giudice's attorney, Joe Tacopina, said in a press release on Friday that he is "confident that the evidence will show that Teresa is not guilty. She remains innocent of any wrongdoing." Teresa Giudice is the sixth "Real Housewives of New Jersey" star to find herself in court over her financial woes. The other "Real Housewives of New Jersey" stars include Danielle Staub, who was sentenced to two years of probation, Jacqueline Laurita, who received a four-month prison sentence, Margaret Josephs, who was sentenced to home confinement and a \$15,000 fine, and Jennifer Aydin, who was placed on 18 months of probation.

Structure-specific, quantitative and site-specific linkage of X- and Y-chromosomes in cattle using DNA polymorphism and a high resolution melting screening system. In cattle a differential distribution of X- and Y-chromosomes has been observed among various breeds and this is thought to be caused by a different recombination frequency of these chromosomes. The X- and Y-chromosome-specific bi-allelic polymorphism markers CCND1 (ALDH4A1
