I was using Google maps to find the area I wanted and was using the Smart Cropping feature of the application to crop the map to my image. This allowed me to crop the “top” of the image and pull a portion of the map onto the image. There are various ways to use the guide feature in the application. Adobe Photoshop Elements 2021 uses especially large numbers for resolutions. A 600 DPI file can use the current guide line on a 2560×1440 resolution image. The guide line is easy to use however, if you are working on a portion of the image. However, if you are working on an entire image, the guide line can take up most of the frame. However, as I noted earlier, I believe that Lightroom should also be given some real consideration. You cannot do the final content-to-print work with either tool. You need the whole package. If I am about to acquire a new iPad Pro, I will be going with the new iPad Pro with Pencil. Until that day comes, however, let me recommend Adobe Photoshop Elements 2021. It’s the perfect application to tidy, edit, and organize your digital photographs without taking too much space on your computer. Touch ID will probably never replace fingerprint scanners because the digitizing process is still probably too difficult. As researchers develop the holy grail of biometric encryption, modern fingerprint scanners should look pretty bad.
