Adobe Photoshop is a solitary paintbrush, but the latest in 2019 unlocks the power of people to collaborate and deliver results in a matter of seconds. Share for Review (beta) enables users to collaborate on projects with a single click, without leaving Photoshop, while five-minute file sync offers a faster track for large files, and the Share Panel enables multiple users to join projects at the same time. To ensure Photoshop stays effective and relevant over time, projects that improve the workflow are rigorously considered for inclusion in the most advanced editions. While enabling designers to unlock the full potential of their most recent artwork, workflows will also be optimized to maximize the benefits of the latest technology and hidden features. The latest version, which ships for free, has made many improvements to the applications interface and features, especially the robust tools and options for adjusting color and clarity. It features a new look that streamlines the apps' interface. It includes touch functionality to make the apps more accessible to users who are less familiar with desktop operating systems. The price is the same as previous versions at $69. Adobe's Elements also now has a new pricing model that gives users more options for where they buy the tool. It's hoped that this will increase the uptake of the software. The new Elements should be available for download in the next few weeks. Meanwhile, you can look for a more detailed guide to the upgrade process here.
